

ROLLING SLAT DOORS | MODEL 5700

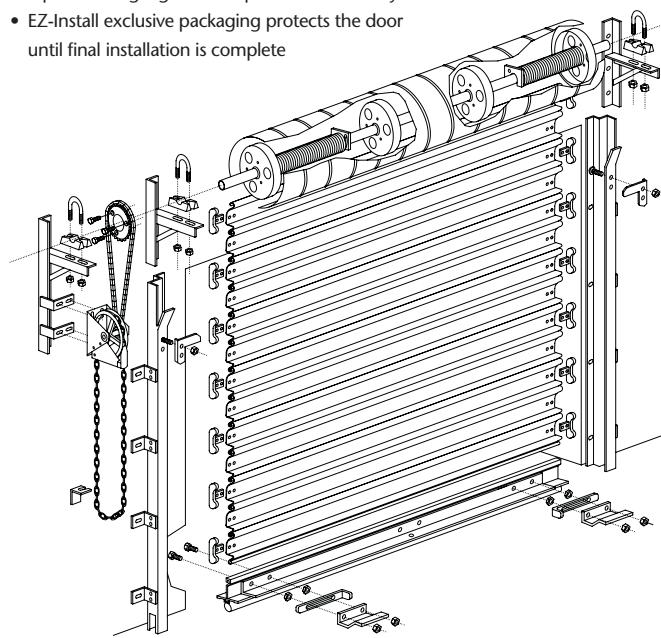

Construction

Model 5700

Medium-duty service door

- Fully enclosed 12" galvanized steel barrel
- 3" replaceable slats made from 24 gauge hot-dipped galvanized steel
- Individual slats can be replaced easily if damaged by equipment traffic ensuring security, safety and long-lasting aesthetic appeal
- Extruded aluminum bottom bar with integral reinforcement includes a two-part posi-lock door stop for additional safety
- Full width PVC bulb-type astragal provides seal for irregular floors
- Roll-formed 16-gauge hot-dipped galvanized guides
- Standard UHMW Nylon end locks reduce friction and noise and provides curtain alignment during operation
- Available in sizes up to 14 feet (4.267 m) wide and 14 feet (4.267 m) high
- Optional electric operators provide maximum opening convenience and effortless operation
- Optional 20-gauge hex-shaped hood assembly available
- EZ-Install exclusive packaging protects the door until final installation is complete

The Model 5700 rolling slat steel door provides a medium-duty service door at the economical price-point of sheet roll-up or sectional doors. The curtains are constructed of individual 3" slats that provide strength and security that can easily be repaired in high-traffic applications. Standard wind load ratings far exceed industry standards for comparable roll-up and sectional doors, making the Model 5700 the natural choice for coastal area or high-security warehousing.

Available with curved or flat slat profiles, the 5700 Series is available in galvanized or pre-painted white, lightstone tan, and duro-bronze colors. All colors have a white interior prime coat to ensure a long-lasting finish.

SLATS

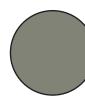

CURVED SLAT (MODEL 5700)

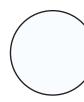

FLAT SLAT (MODEL 5701)
